OBJECTIVE

Motivated B.Tech Computer Science student (2024–2028) seeking a software engineering or full-stack development internship. Proven ability to build and deploy production-grade applications using MERN Stack, Android (Java), and Firebase. Experienced in REST API design, MVC architecture, and scalable backend systems. Passionate about Cybersecurity, Generative AI, and solving real-world problems through software.

EDUCATION

B.Tech – Computer Science and Engineering	2024 – 2028 CGPA: 7.14
12th – Higher Secondary (CBSE, Haryana)	2024 Percentage: 75%
10th – Secondary (CBSE, Haryana)	2022 Percentage: 88.8%

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, SQL
Frontend: React.js, HTML, CSS, EJS, XML (Android), Figma (UI/UX)
Backend: Node.js, Express.js, Flask, REST APIs, MVC Architecture
Databases: MongoDB, MySQL, Firebase Realtime Database, Firestore
Mobile: Android Studio, Java (Android), Firebase, Cloudinary Integration
AI/ML: TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib
Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman
Core Concepts: DSA, OOP, DBMS, System Design, Cybersecurity Fundamentals, Generative AI

PROJECTS

- Qmanage – Restaurant Order Management Platform** | *Node.js, Express, MongoDB, EJS, REST APIs* 2025
- Built a production-ready full-stack food ordering platform with server-side rendering using Node.js, Express, and EJS following clean MVC architecture.
 - Designed and implemented full CRUD REST APIs for outlets, menu items, and orders; integrated payment gateway for secure checkout.
 - Developed a rich frontend OOP architecture (Cart, FoodItem, Outlet classes) with real-time order status tracking, dynamic filters, and admin console.
 - Optimized API workflows and MongoDB queries, reducing order processing time by 30%.
 - GitHub: github.com/Aimbot01/Qmanage
- Smart Attend – Attendance Management Android App** | *Java, Android Studio, Firebase, Cloudinary* 2025
- Developed a smart attendance management Android application for students and faculty using Java and Android Studio.
 - Integrated Firebase Authentication and Firebase Realtime Database / Firestore for secure login and real-time data synchronization.
 - Implemented Cloudinary integration for cloud-based image storage and management.
 - Features include real-time attendance marking, attendance history management, and a user-friendly responsive mobile UI.
 - GitHub: github.com/Aimbot01/Smart-Attend
- EOMS – E-Commerce Order Management System** | *HTML, CSS, JavaScript, MySQL* 2025
- Built a full-stack e-commerce backend system with inventory and order management capabilities.
 - Implemented advanced DBMS design using MySQL with dashboard analytics for order monitoring.
 - GitHub: github.com/Aimbot01/EOMS

EXPERIENCE

AI Response Reviewer (Contract) <i>Outlier – AI Development Company</i>	Nov 2024 – Feb 2025 <i>Remote</i>
- Reviewed and improved AI-generated outputs for accuracy, relevance, and clarity at scale. - Performed LaTeX correction, technical formatting, and validation of AI responses across STEM domains. - Conducted data quality assessment to enhance AI model performance and output consistency.	

ACHIEVEMENTS & LEADERSHIP

- Hackathon 2025:** Secured Second Prize among 50+ competing teams.
- ACM Student Chapter:** Active member contributing to technical events and knowledge sharing.
- Student Coordinator:** Organized and managed 5 workshops with 200+ total participants.

AREAS OF INTEREST

Full Stack Web Development | Android App Development | Generative AI & LLMs | Cybersecurity & Secure System Design | Data Analytics | Backend Engineering & System Design
